

Regulations for Applying and Allocating Telecommunications Numbers

Article 9

When a telecommunications enterprise applies to the competent authority for the allocation of signaling point codes, it should submit the following documents :

1. Telecommunications Number Application Form
2. Signaling point code use plan (including the expected location of the network's point of interface interconnected with other public telecommunications networks, and its signal method, network framework and capacity planning data)
3. Relevant supporting documents of the telecommunications enterprise registration
4. Other materials designated by the competent authority

Article 13

When a telecommunications enterprise applies to the competent authority for the allocation of identification codes, it should submit the following documents :

1. Telecommunications Number Application Form
2. Identification code use plan (including the expected location of the network's point of interface interconnected with other public telecommunications networks, and its network framework and capacity planning data)
3. Relevant supporting documents of the telecommunications enterprise registration
4. Other materials designated by the competent authority

Article 16

A government agency (organization) , public welfare association, foundation, independent administrative institution or public enterprise for the need of providing emergency rescue services, public affair counseling services, public rescue services or charity services, etc., may apply to the competent agency for the allocation of special telecommunications numbers, after the approval by the national competent authority for business objectives or the superior authority by reviewing their statutory duties, establishment purposes, public welfare needs, etc.

The public utilities mentioned in the preceding paragraph refer to the following :

1. Electricity enterprises
2. Water supply enterprises
3. Public utilities recognized by the competent authority or the national competent authorities for business objectives.

The applicants prescribed in Paragraph 1 should submit the following documents to the competent authority to apply :

1. Telecommunications Number Application Form

2. A photocopy of the approval letter from the national competent authority for business objectives or the superior authority for each of the government agency (organization) , public welfare group, foundation, incorporated administrative agency or public utility, and a photocopy of the supporting document of the public welfare group, foundation, incorporated administrative agency or public utility

3. Special telecommunications number service plan

4. The relevant documents that the telecommunications enterprise allocated with local line phone numbers and mobile phone numbers agrees to cooperate in the provision of special telecommunications numbers

The special telecommunications number service plan prescribed in Subparagraph 3 of the preceding paragraph shall clearly state the network framework, service provision method, service scope and object, service content, charging method, and other matters designated by the competent authority.

If the content that shall be stated regulated in previous paragraph is changed, the rationales of the changes shall be provided, along with the revised service plan, and an application for approval shall be submitted to the competent authority.

Article 20

When a telecommunications enterprise applies to the competent authority for the allocation of subscriber numbers, it shall submit the following documents :

1. Telecommunications Number Application Form

2. Subscriber number usage plan (Subscriber growth forecast data, network framework and capacity planning data)

3. Number of subscribers (exempt for the first-time applicant)

4. Sampling inspection report from an institution with public credibility (exempt for the first-time applicant)

5. Relevant supporting documents of the telecommunications enterprise registration

6. Other materials designated by the competent authority

The sampling inspection report from an institution with public credibility prescribed in Subparagraph 4 of the preceding paragraph refers to the sampling verification report of the number of subscribers issued by two persons with the expertise of science, engineering, commerce or management who are registered in the talent database of the Public Construction Commission, Executive Yuan.
